SUMMARY

Full-Stack Software Engineer with 3+ years of experience designing, building, and deploying scalable microservices and production-grade web applications using React, Next.js, and Spring Boot. Skilled in containerization, cloud deployment (GCP, Docker, Kubernetes), and end-to-end ownership of document management systems, from secure API design to responsive UI delivery.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, TailwindCSS, Zustand, React Query, Redux

Backend: Node.js, Spring Boot, Express.js, REST APIs, Prisma, Python, Java

Database: PostgreSQL, MySQL, MongoDB, Supabase

DevOps / Cloud: Docker, Kubernetes, Google Cloud Platform (GCP), Linux, CI/CD

EXPERIENCE

Senior Full Stack Software Engineer — HSBC Technologies *July 2025 – Present*

- Architected and maintained scalable microservices using Spring Boot, extending a document management platform used by internal teams across the organization.
- Built a high-performance React application for end-to-end document management, enabling users to securely upload, download, and view documents alongside comprehensive metadata.
- Implemented secure authentication and authorization by integrating Single Sign-On (SSO), strengthening application security and streamlining the user login experience.

Software Engineer — HSBC Technologies *August 2023 – July 2025*

- Developed and maintained 20 scalable microservices using Spring Boot as part of a core document management system.
- Engineered core document processing features, including secure upload, download, and asynchronous search capabilities, improving data accessibility for end-users.
- Implemented containerized deployment workflows using Docker and Kubernetes, streamlining build and release processes across environments.

PROJECTS

Realtime Chat App ([Live Link](#))

Tech Stack: Next.js 14, Convex DB, TypeScript, TailwindCSS, Clerk Auth

- Built a full-stack real-time chat application supporting instant messaging, friend requests, and group chat functionality.

Spotify Clone ([Live Link](#))

Tech Stack: Next.js 14, Supabase, TypeScript, TailwindCSS, Supabase Auth

- Developed a music streaming application enabling users to sign up, upload, and like songs, with Supabase-backed authentication and storage.

Twitter Clone ([Live Link](#))

Tech Stack: Next.js 14, MongoDB, TypeScript, TailwindCSS, Prisma, Auth.js

- Built a full-featured social media clone supporting post creation, commenting, liking, and following, backed by MongoDB and Prisma.

EDUCATION

B.Tech in Computer Science — MIT World Peace University, Pune *July 2019 – June 2023*

CGPA: 9.32 / 10
